AIR MONITOR

BROAD Clean Air Product

Detect Air Pollution and
Oxygen Level with One Press

A PM2.5 & CO₂ monitor that
is 100 times smaller than
traditional products

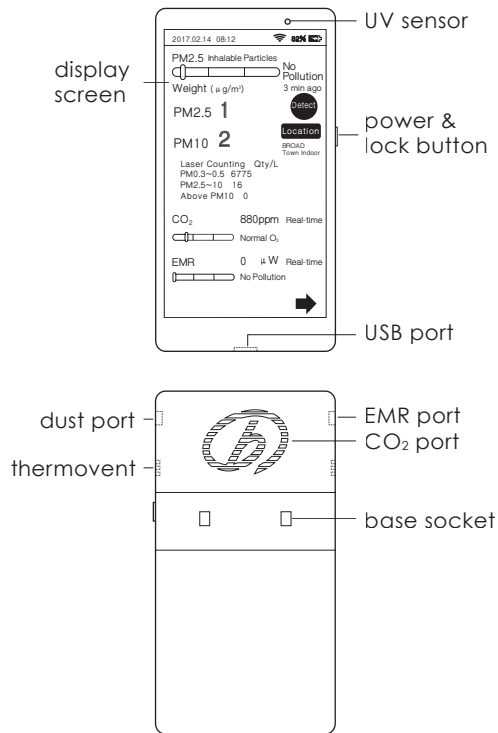

Model : FG1

■ One of BROAD's Top 10 Inventions: the Air Monitor

2009 - Make it possible for public to
detect PM2.5 anytime, anywhere

Professionals used to use different
instruments to detect dust, CO₂,
electromagnetic radiation and ultraviolet
rays, etc. BROAD has successfully
integrated those functions into a single
device which is almost a hundred times
smaller, so that it can be easily carried
and used by anyone, anywhere. This
seems to be just a simple technical
innovation, in fact, this invention has
actually cultivated an ideological
revolution – it ignited the "PM2.5" testing
boom in China. Perhaps in the near
future, it will become a daily habit for
people to detect environmental pollution
levels. By that time, humanity will evolve
from the "era of consumerism" into the
"era of conscious living"

■ Structural Diagram

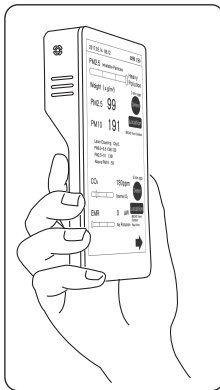

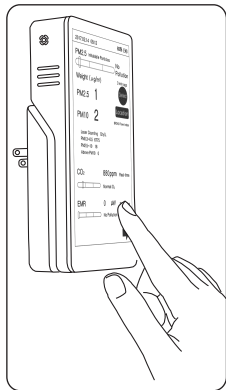

■ Application

Wall-mounted (plug in a socket)

Handheld (8 hrs of battery life, 7 days standby)

Indoor (wall-mounted) Outdoor (portable)

■ Troubleshooting

No.	Problem	Cause & Solution
1	Power on failed	• Low battery. Needs charging
2	Black screen	• The screen is locked or the monitor is in standby mode, unlock the screen • Battery is dead. Needs charging
3	No detection value	Sensor failure. Needs repairing *
4	Obvious deviation in dust value	• Excessive detections. Needs cleaning * • The device is too close to your breath. Keep distance
5	Detection value shows 0	• No pollution. Normal • The air pump is blocked. Needs repairing * • Sensor problem. Needs repairing *
6	Time flickers	Restore to factory setting & reset the time

Note: for items marked with *, please contact BROAD or a BROAD authorised service supplier immediately

■ Warranty

- 1-year warranty from the date of purchase
- For problems caused by design, manufacturing or factory transportation, free repair or replacement will be provided. Maintenance for other reasons will be charged
- Do not disassemble the device or accessories without authorization, otherwise the warranty will be voided

■ Maintenance

- Keep the device and its accessories dry and away from liquid
- Do not hit or impact the device or its accessories to avoid damage, battery combustion or explosion
- If the device suffered intense impact by external force, do not touch or try to remove the broken parts. Stop using the device and seek help from a BROAD authorized service center
